

# HealthPros

International Training Network for  
Healthcare Performance Intelligence Professionals

## Introduction

Here we present the 9<sup>th</sup> HealthPros newsletter. In the previous Newsletters we have presented all the teams, and although the project was extended for 4 months, we are nearing the end of the HealthPros project. Some of the fellows are finalizing their theses and moving on. Exemplary for that is also the recent final HealthPros consortium meeting in Utrecht (Nov 3-5, 2021), where the focus for most fellows was to present and discuss their thesis outline. We were very happy to be able to (at least partly) meet face-to-face again for this meeting. Find a summary below.

## A report from the Fall Meeting (Nov 3-5, 2021) in Utrecht, The Netherlands.

November 3-5 2021 the 7<sup>th</sup> HealthPros consortium meeting was organized in Utrecht, The Netherlands. Despite the uncertainties of the COVID-19 pandemic, we were very fortunate and happy to be able to meet most of the fellows and some of the PI's in person again and have all others present in a virtual fashion. We asked all fellows beforehand whether they wanted to present a paper or their thesis outline, and based on that assigned 2 reviewers per fellow. The fellows then provided a summary and associated documents and sent these a week before the meeting to their reviewers to prepare. During the meeting we had 1 hour per fellow, where they presented their work in ~15-20 minutes after which the reviewers gave their comments. We

would like to compliment all fellows and reviewers for their extensive work and preparation which made this meeting to a success. It was very good to see 3 years of work coming together and made us realize what a very nice consortium and project this has been!

## HealthPros Publications

As now the HealthPros training network is in the final year, papers are being published regularly. Please visit our website to stay updated. [Output \(healthpros-h2020.eu\)](https://www.healthpros-h2020.eu)

## Webinars

Two new webinars were added to the website;

Claire Willmington gave a presentation on "Estimating variations in antibiotic prescribing; Insights from the Tuscany region, Italy" and Mekha Ann Mathew discussed "The primary care in England during Covid-19 pandemic and how it affected people with chronic conditions." - this webinar addresses the methods that will be used in the study and will be updated with a newer one once the data access is sorted and results are achieved.

## Upcoming meetings

February 24<sup>th</sup>, we aim to meet for a last meeting with the management team of the HealthPros

consortium, followed by a final public (digital) event on February 25<sup>th</sup> 2022, discussing ‘The transferability of HealthPros’ findings to high, middle and low-income health care systems’ with international experts. In advance of the public event, we will distribute 3-minute video’s on the main findings of each fellow’s project.

Please save the date for the public event. Further details will follow in January.

For more information on the network and topics/input for the next newsletter please contact the project manager (Laurian Jongejan);
